

What can we do to minimise the number of road crashes on Queensland roads?

In 2020, over 270 people tragically lost their lives on Queensland's roads and thousands more were injured.

What can we learn from road crash data and other data, for example, police and weather data to reduce the risks for road users and motorists on Queensland roads?

Use data from the Queensland Open Data Portal, [data.qld.gov.au](http://data.qld.gov.au), to formulate your response.

### How to prepare your solution:

1. Think about the challenge questions and additional information.
2. Search for data to use. Your solution must use at least one dataset from [data.qld.gov.au](http://data.qld.gov.au). however, you can also include data from other sources.
3. Develop a unique, creative solution to the challenge questions. Check out [last year's winners](#) for some examples.
4. [Prepare your 3-minute video](#) based on GovHack's guidelines.
5. [Submit your solution](#), including the video, and a minimum viable product via the Hackerspace.
6. Get ready for the awards night!
