Help us survive a pandemic!

- COVID-19 has spread across the world causing significant death and illness to millions.
- Living in lock-down, social distancing, contract tracing, accessing health care and improving fitness have all been used to minimise negative effects.
- How can we improve these services to aid recovery and prepare for future pandemics?

How to prepare your solution:

1. Think about the challenge question and additional information above.
2. Search for data to use. Your solution must use at least one dataset from data.qld.gov.au however you can mix and match this with data from other sources.
3. Develop a unique, creative solution to the challenge question. Check out last year's winners for some examples.
4. Prepare your 3-minute video based on GovHack's guidelines.
5. Submit your solution including the video and a minimum viable product via the Hackerspace.
6. Get ready for the awards night!
