

Language services reporting 2016-17— explanatory notes

1. The percentage of clients requiring an interpreter is based upon the flag in LAQ office which shows where clients self-report requiring an interpreter when accessing Legal Aid Queensland services. Only services that can be matched to a client record are reported (Casework, legal advice, legal task and family law duty lawyer).
2. This figure represents a count of grants of aid for interpreter services on casework files, together with a count of non-casework services including, but not limited to, information services and legal advice services.
